

The DIPF | Leibniz Institute for Educational Research and Educational Information contributes to mastering challenges in education with empirical research, digital infrastructure and knowledge transfer. At its locations in Frankfurt am Main and Berlin, the DIPF develops and documents knowledge about education and thus supports science, politics and practice.

The Educational Technology department (Educational Technologies <http://edutec.science/>, Head: Prof. Dr. H. Drachsler) is looking to start as soon as possible:

One student assistant (Hiwi)

about 40 hours per month
initially limited until 30.05.2021

The office is located in Frankfurt am Main, in the immediate vicinity of the **Westend Campus**. Until further notice, all activities can be carried out via **remote working**, provided that a suitable workstation with Internet access is available.

Your tasks

- Critically review and analyze an already existing collection of resources in the field of Artificial Intelligence in Education. The resources have been already summarized in a table.
- Integrate the information with additional data or resources found in the related literature
- Write an extensive report about the similarities and differences of the collected resources
- Derive main trends, directions and commonalities among the reviewed resources and include these in the final report
- Draw conclusions where additional work needs to be done

Requirements

- Enrollment at a German university, preferably in a social science or computer science program
- Independent work and commitment
- Good knowledge of written English
- Basic about Artificial Intelligence systems
- Good knowledge of educational systems
- IT affinity, very precise work and pleasure in working with data are an advantage.

We offer a pleasant working atmosphere, flexible working hours, a payment of 11 € per hour for bachelor students and 13 € per hour for master students with a bachelor degree, insights in empirical, scientific work in an interdisciplinary team (among others with professors and doctoral students) as well as the possibility of an extension of employment as a student assistant.

The DIPF promotes equality for all employees* and welcomes applications regardless of ethnic, cultural or social background, age, religion, ideology, disability, gender or sexual identity. Severely disabled persons are given special consideration if they are equally qualified.

Are you interested in joining our team? Then please send your application in electronic form and summarized in a pdf-document including a tabular CV and certificate of enrolment until 23.12.2020, quoting the reference number HIWI-2020-AIED, to
